Profile

Penetration tester and security researcher with more than nine years across enterprise infrastructure, security operations, and authorized offensive-security assessments. Focuses on web, API, mobile, infrastructure, Active Directory, wireless, and remediation-focused reporting. Publishes evidence-led research and practical tools at cyberkareem.com.

Public research

Verified 11 July 2026: credited as finder on 14 published security advisories, including 6 public CVE assignments. [View the public research record](#)

Professional experience

- Penetration Tester | Ejabi InfoSec**

APR 2026 - PRESENT

 - Deliver authorized web, API, and mobile application assessments with reproducible evidence, severity rationale, remediation reporting, and scoped reverse-engineering support.
- Cybersecurity Specialist | Smart Oasis Company**

FEB 2026 - APR 2026

 - Performed authorized network and identity assessments, vulnerability validation, security monitoring, and security-by-design review.
- IT & Telecommunications Specialist | United Nations - UNAMI**

DEC 2017 - DEC 2025

 - Supported multi-site enterprise infrastructure, identity, network operations, and security response for eight years.
 - Led Active Directory, Microsoft cloud, collaboration, and network modernization.
 - Built NIST SP 800-88-informed media-sanitization workflows with device validation and audit logging; also delivered security-awareness training.
- Earlier technical roles | NOC, IT, electrical, and field engineering**

2014 - 2017

LAN/WAN operations, PRTG monitoring, enterprise systems, physical-security technology, and field engineering.

Credentials, education & portfolio

CREDENTIAL	ISSUER	PUBLIC RECORD
OSWE	OffSec	Issued Jun 2026 current
OSEP	OffSec	Issued May 2026 current
OSCP+ / OSCP	OffSec	Issued Mar 2026 OSCP+ valid to Mar 2029
eMAPT	INE Security	Issued Mar 2026 valid to Mar 2029
HTB CPTS	Hack The Box	Issued May 2026 current
CISSP	ISC2	Issued Jan 2026 valid to Jan 2029
PMP	PMI	Issued Jan 2026 valid to Jan 2029
OSWP	OffSec	Issued Oct 2022 current
eCPPT	INE Security	Issued Aug 2022 current

Verification: [public certification record](#)

Education

MSc Information Security & Digital Forensics University of East London	EXPECTED DEC 2026
MSc Information Technology - Cybersecurity focus University of the People	AUG 2025
BSc Electrical & Electronics Engineering University of Anbar	2015

Selected open-source work

SurfaceLens | Local-first attack-surface workbench for recon normalization, explainable ranking, snapshot comparison, and analyst-ready export.

seg-test | Bounded CDE reachability evidence runner for authorized PCI DSS segmentation-testing workflows; conclusions require qualified human review.

Secure Automated Purge USB | Bootable media-sanitization prototype with destructive confirmation and post-operation sector sampling; current standards and hardware validation remain required.

kameMind | Locally hosted engagement-assistant prototype for session memory, findings, tool-output analysis, and walkthrough export.

Technical strengths

Tools & engineering | Burp Suite, Caido, Nmap, Nessus, MobSF, Frida, BloodHound, Impacket, Wireshark, Python, PowerShell, Bash, C#, Azure, Active Directory, Microsoft 365, Cisco Meraki, and PRTG.

Methods & languages | PTES, OWASP Top 10, OWASP MASVS, CVSS, MITRE ATT&CK, NIST CSF, documented rules of engagement; Arabic (native) and English (fluent professional).
